-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *17 March 2006*.

2a)☐ This action is **FINAL**. 2b)☒ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) *1,2,6-9,13-16,20-22,25,28-30,33-37,40-53,55-59 and 61-63* is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

6)☒ Claim(s) *1,2,6-9,13-16,20-22,25,28-30,33-37,40-53,55-59 and 61-63* is/are rejected.

7)☐ Claim(s) _____ is/are objected to.

8)☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9)☐ The specification is objected to by the Examiner.

10)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a)☐ All b)☐ Some * c)☐ None of:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date ____.
4) ☐ Interview Summary (PTO-413) Paper No(s)/Mail Date. _____.
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/17/06 has been entered.

Receipt is acknowledged of amendments and response filed 01/27/06. Claims 1, 8, 15, 22, 25, 28, 29, 30, 33, 35-37, 41 and 43 have been amended and claims 3-5,10-12, 17-19, 23-24, 26-27, 31-32, 38-39, 54 and 60 have been cancelled. Accordingly claims 1, 2, 6-9, 13-16, 20-22, 25, 28-30, 33-37, 40-53, 55-59 and 61-63 are pending.

Objection

Claim 37 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 2. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 2, 6-9, 13-16, 20-22, 25, 28-30, 35-37, 40-53, 55-59 and 61-63 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tai (5,013,557) in view of Kawakami et al (The Rational for E2020 as a potent acetylcholinesterase inhibitor).

Tai discloses taste masking compositions comprising spray dried microcapsules containing sucralfate and methods for preparing same. The spray dried spheroidal microcapsules comprise in percentages by weight between 1 and 70% of **sucralfate** and between 30 and 99% of a polymer soluble in gastric fluids (col. 5, lines 30-60). The **polymers soluble in the gastric fluids** are polymers which **bind to sucralfate** with taste masking properties and dissolve in gastric fluid. The suitable polymers include alginic acid, **carrageenan**, xanthan, etc (col. 6, lines 26-55). Tai lacks specific disclosure on donepezil hydrochloride as the active agent.

Kawakami et al teach E2020 (also known as donepezil hydrochloride) as a potent acetylcholinesterase inhibitor. E2020 was developed for treatment of Alzheimer's disease, and possibly other dementias.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to have modified the formulations of Tai containing a basic

medicine with unpleasant taste and an acidic polysaccharide such as carrageenan with other active agents such as donepezil hydrochloride as taught by Kawakami et al in order to prepare more drug formulations with a masked taste for patient convenience and to increasing patient compliance. In other words, one or ordinary skill in the art having the formulations of Tai, would have been motivated to apply the same method to other medications with unpleasant taste in order to provide better tasting medication for patients and increase patient compliance.

Claims 33-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tai (5,013,557) in view of Kawakami et al (The Rational for E2020 as a potent acetylcholinesterase inhibitor) as applied to claims 1, 2, 6-9, 13-16, 20-22, 25, 28-30, 33-37, 40-53, 55-59 and 61-63 above, and further in view of Morikazu et al (JP 4-346937).

The combined references, discussed above, lack specific disclosure on derivatives of carrageenan.

Morikazu teaches a method of simply and economically reducing bitterness of drugs and foods. For that, Morikazu mixes a bitter substance with a gelatininzing agent such as gelatin, *k*-carrageenan, etc and a seasoning agent, preferably a sweetener (see abstract).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to have implemented the gelatinizing agents such as *k*-carrageenan as taught by Moikazu into the drug formulations of the combined references with the reasonable expectations of successfully preparing a safe and effective drug formulation without a bitter or unpleasant taste for patients that need such medicaments.

Claims 1, 2, 6-9, 13-16, 20-22, 25, 28-30, 33-37, 40-53, 55-59 and 61-63 are rejected under 35 U.S.C. 103(a) as being unpatentable over Diehl (5,612,026) in view of Kawakami et al (The Rational for E2020 as a potent acetylcholinesterase inhibitor), and further in view of Morikazu et al (JP 4-346937).

Diehl discloses drink mix compositions comprising a therapeutically effective dose of an **anionic exchange resin**, from about 0.05 to about 1.25g of xanthan gum and an edible, water soluble salt (col. 2, lines 13-17). The anion exchange resin means any resinous material having cationic moieties, such as *cholestyramine* and *colestipol* hydrochloride, both of which are strongly basic anion exchange resins (col. 3, lines 15-30). Diehl also discloses that edible water soluble salts MAY be added (col. 3, lines 48-62). Other materials including bulking agents and carriers may be added. Such materials can be oligosaccharides and **polysaccharides** (col. 5, lines 20-45). The resulting dosage form is typically granules (col. 6, lines 62-67).

Diehl also discloses a method of preparing the said formulations, where cholestyramine, xanthan gum and maltodextrin are charged and allowed to mix (col. 6, lines 45-67). Diehl lacks specific disclosure on other basic medicines and other specific polysaccharides for the said formulation.

Kawakani teaches doenepezil hydrochloside and Morikazu teaches polysaccharides such as *k*-carrageenan for mixing with bitter medicines.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to have substituted one basic active agent for the other as taught by Kawakami et al in order to benefit from the masking properties for more medications with unpleasant taste. Furthermore, one of ordinary skill would have been motivated to have looked for other suitable agents for assisting with masking of bitter tastes of some medicaments as taught by Morikazu. In other words, one of ordinary skill would be motivated to look for other suitable medicinal components with unpleasant taste and other suitable agents for masking the taste to implement the same method for them in order to provide the same benefit for more patients.

Response to Arguments

Applicant's arguments filed on 01/27/06 have been fully considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mina Haghighatian whose telephone number is 571-272-0615. The.examiner can normally be reached on core office hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-100.
